New York, NY.

Tatyana Shkolnikova, MD.

Sana Shaikh, MD.

Harris Shaikh, MD.

December 14-18, 2012.

Melissa Wu, MD.

NYSSA 66th PGA.

Mohammad Chaudhry, MD.

S. Cohen, V. McRae, G. Kiss, A. Mohiuddin, C. Hunter.

Ob/Gyn.

R. Alloteh, A. Burr, S. Barsoum, S. Cohen.

Obstetrics.

Andrew Burr, MD.

James Tse, Ph.D., MD.

NYSSA 66th PGA.

Cardiac.

April 6-10, 2013.

Jane Kim MD.

General.

Sameet Syed, MD.
A Simple technique to prevent severe desaturation and reduce the risk of fire hazard under deep propofol sedation during upper GI Endoscopy.

No-Cost TSE Mask reduces severe desaturation and the need for assisted bag-mask ventilation in elderly patients under deep propofol sedation during upper GI Endoscopy.

TSE Mask improves oxygenation and prevents severe desaturation in obese patients under deep propofol sedation.

TSE Mask: Simple technique to improve oxygenation, prevent severe desaturation and reduce risk of fire hazard under deep propofol sedation during upper GI Endoscopy.

Is high nasal cannula oxygen flow more efficient than TSE Mask in reducing severe desaturation in patients under deep propofol sedation during upper GI Endoscopy?

Minimally Invasive Extraction of Intracardiac Debris with the AngioVac System.

Cardioversion/AICE testing.

Is Epidural-PCA analgesia necessary for a third day post Cesarean Section pain?

Prophylaxis vs therapeutic blood patch for accidental dural puncture in obstetric patients.

When does an Obstetric anesthesia attending rescue from a failed attempt at inserting an epidural catheter for Epidural Block in Obstetric Patients?

Is Epidural-PCA analgesia necessary for a third day post Cesarean Section pain?
