OUTREACH TO HIGH-RISK YOUTH AND WOMEN

Each year since 2002 RWJAP has received Minority AIDS Initiative funding through the New Jersey HIV Family Centered Care Network. These funds provide outreach, risk-reduction education and HIV testing by RWJAP’s nurse educator for at risk youth in areas of the city of Perth Amboy where high-risk youth are known to congregate.

Outreach to women comes via many venues including Community Health Fairs and through the Emergency Room Rapid HIV Test Project.
