Rapid HIV Testing: In January of 2005, RWJAP received funding from the New Jersey Department of Health and Senior Services, Division of AIDS and Prevention Control, to work in collaboration with Robert Wood Johnson Medical School’s Counseling and Testing Site on a Rapid HIV Test Project. The project offers Rapid HIV testing to patients presenting at the Emergency Rooms at Robert Wood Johnson University Hospital and the Bristol Myers-Squibb Children’s Hospital as well as the Department of Pediatrics Outpatient Adolescent Unit. RWJAP’s Clinical Care Coordinator, Blanca Jackson provides in-depth training on HIV to the Emergency Department’s medicine and nursing staff. Currently the project has a full time HIV counselor and a per diem HIV counselor who provide HIV testing and counseling services. Major goals of this project are to assess at-risk patients, encourage testing, identify positives and get them into care, and educate high risk individuals about prevention. For additional information please call Blanca Jackson, 732-235-6142.
