### Overall Educational Goal:
Complementary and Alternative Medicine is rapidly gaining popularity with many patients. This non-credit elective was designed in order to expose medical students to the many CAM modalities that are currently available, in order to better serve their patients and advocate for healing.

### Objectives
The Complementary and Alternative Medicine non-credit elective serves to introduce Robert Wood Johnson Medical Students and the larger RWJMS community to different alternative and complimentary medical modalities.

### Brief Description of Activities
There are 6-8 lectures, seminars or workshops each year, each covering a different topic within Complimentary or alternative or integrative medicine.

### Method of Evaluation
Participants must attend 70% of the lectures offered in order to receive credit.
