OVERALL EDUCATIONAL GOAL OF ELECTIVE
To develop proficiency in routine neurological evaluation and patient interaction and to introduce the student to treatment of the common neurological conditions

OBJECTIVES
- To develop skills in the clinical evaluation of the nervous system and in the interpretation of laboratory procedures and special diagnostic tests
- To become familiar with the signs, symptoms, clinical course and current therapeutic aspects of the more common disorders of the nervous system encountered in practice
- Learn the uses and limitations of current diagnostic procedures

BRIEF DESCRIPTION OF ACTIVITIES
Hospital neurologic consultations with attending neurologist; review of radiologic studies; office patient evaluations and treatment; lectures, morning report, informal discussions

METHOD OF EVALUATION
Two hours and ten minutes written examination (National Boards), quality of interaction with attendings, quality of case write up.

NOTE: The requirement in neurology may be fulfilled at Robert Wood Johnson Medical School or at Jersey Shore University Medical Center. Students at all sites will be assigned the same required text, attend the 16 seminars in New Brunswick and take the final exam in New Brunswick together.
