

Stephen Moorman, PhD

Dr. Moorman is a classically trained anatomist with expertise in both human anatomy and veterinary anatomy. Prior to joining the Robert Wood Johnson Medical School he held faculty positions at the University of Michigan, the UNT Health Science Center in Fort Worth, TX and at Case Western Reserve University in Cleveland, OH. Dr. Moorman is a Stuart D. Cook Master Educator and a former President of the Master Educators Guild. His educational research interests are in the use of technology in the classroom and to enhance learning on-line, in developing new approaches to assessment, and in learning analytics. Dr. Moorman's has a long-standing interest in zebrafish developmental biology, which has been funded by NIH and by NASA.
