

## ***Dementia Evaluation Clinic***

The Dementia Evaluation Clinic is staffed by physicians who are board certified in both Neurology and Psychiatry, as well as social workers who can help with social supports and referrals. The clinic provides diagnosis and ongoing treatment of illness that include cognitive impairment, including Alzheimer's disease, Parkinson's disease, traumatic brain injury and stroke. The clinic is a collaborative effort with the Department of Neurology.

### **Adult Psychiatric Clinic**

The Adult Psychiatry Clinic provides diagnosis and treatment of a wide variety of psychiatry disorders. Our providers are academic faculty members at Robert Wood Johnson Medical School and are involved in cutting edge research in diagnosis and treatment and are committed to improving mental and emotional health by providing outstanding outpatient services. Our psychiatrists and psychologists can also provide expert consultations and second opinions for individuals and their caregivers. A full range of psychological therapies, including cognitive behavioral therapy, biofeedback, supportive therapy and insight oriented therapy are available. Sophisticated psychopharmacology approaches are also offered and tailored to the individual's situation. Specialty areas include management of bipolar disorder and conditions associated with Parkinson's disease and epilepsy.

### **Addiction Program**

The Addiction Psychiatry Clinic offers a full range of services including evaluation, diagnosis, and treatment of adults who are suffering from one or more disorders related to addiction. This may include disorders involving alcohol and legal and illegal drugs, including tobacco. We also have expertise in individuals with co-occurring mental illnesses and addictions. Sophisticated psychopharmacology approaches including naltrexone and buprenorphine (Suboxone) are offered as part of an overall approach to treating addictions. Specialized counseling for addictions is also available.

### **Child & Adolescent Psychopharmacology Program**

The Child & Adolescent Psychopharmacology Clinic provides psychiatric evaluations for the pharmacologic management of childhood mental disorders including, but not limited to, attention deficit/ hyperactivity disorder, depression, anxiety and other behavioral problems. The Clinic accepts referrals from other physicians and mental health professionals for the consultation and/or joint management of cases. Fellows and residents in training provide care under the direct supervision of the attending physician/faculty member.

### **Huntington's Disease Program**

The Huntington's Disease Program is designed to meet the special medical, psychiatric, genetic counseling and case management needs of patients and families with Huntington's disease. The Program is supported by the New Jersey Department of Health and Senior Services. Individual, family and group counseling is available, and regional support groups are sponsored by the Program's staff. Services included diagnosis, genetic counseling and testing, assessment and treatment, family and professional education and includes access to both psychiatrists and neurologists.

### **Autism Clinic Program**

Autism is a complex neurological disorder that affects the way a person thinks, behaves, communicates and interacts with others. The Autism Center provides assessment, diagnosis, treatment and support for autism spectrum disorders. We offer a range of mental health services for children and young adults. The Autism Clinic has expertise in treating the behavioral symptoms of autism spectrum disorders. Participating in cutting edge research through clinical treatment trials is possible.
