OVERALL EDUCATION GOAL OF ELECTIVE

To expose interested students to the field of medical genetics in a pediatric and perinatal setting.

OBJECTIVES

- Learn to take genetics history
- Learn to perform genetic/dysmorphology physical examination
- Understand genetic risk assessment
- Learn principles of genetic counseling

BRIEF DESCRIPTION OF ACTIVITIES

The student will have contact with genetic consultations in an inpatient and outpatient setting. They will participate in history and physical examination and discussion of laboratory data, genetic, risk assessment and counseling.

METHOD OF EVALUATION

Observation and daily contact by attending geneticist.
