The RWJ working group has met. They have been discussing the differences between GSBS and GSNB. Some differences that were brought are tuition and benefits. The GSBS students have a 12 month appointment, GSNB have a 9 month appointment. Computer software remains different as does the student parking. Comments were made that all students should be treated the same.

The GSBS will be having their work study student working on a database for training grants.

Program growth - In the near future the GSBS would like to expand the MSMBS program, figure out ways to have our students' branch out, apply for the NIH Best grant.
