<u>IMPORTANT</u>

If you are a pregnant patient, and you are having a problem, please call our Obstetrical Coordinator at one of the following numbers:

Monday through Friday – 9am to 5pm (732) 235-6143

*Monday through Friday after 5pm, Saturday, Sunday, or a Legal Holiday (732) 235-6600

*The service will contact the on-call physician

Robert Wood Johnson Medical Group

ROBERT WOOD JOHNSON MEDICAL SCHOOL

DEPARTMENT OF OBSTETRICS, GYNECOLOGY, AND REPRODUCTIVE SCIENCES

OBSTETRIC CARE PRACTICE POLICIES

• The general schedule of prenatal appointments is as follows, the provider may adjust the schedule based on your individual needs during your pregnancy:

8 - 28 weeks

Monthly

28 - 36 weeks

Every two to three weeks

36 weeks - Delivery

Weekly

- At the end of your visit, your provider will advise you to return to the office for your next visit in a certain amount of time. Get in the habit of making your next appointment at the end of your visit. You will be responsible for scheduling all of your regular prenatal appointments.
- Any special appointments with outside providers, such as ultrasounds and consultations, will be made for you by the OB Nurse Coordinator. You will receive your appointment information in the mail.
- We advise that you see the same provider for your first few visits. This will allow the doctor to obtain the majority of your labwork and establish a plan of care for the group to follow.
- It is important that you meet all the providers in our group at least once. Our physicians have a fixed schedule of hospital coverage. One of our physicians is in the hospital twenty-four hours a day, but you cannot predict which physician will be on-call when you arrive at the hospital. Your care will be provided by both male and female physicians.
- Our medical group only provides obstetrical care at Robert Wood Johnson University Hospital.
- Labwork is a very important part of your prenatal care. When a provider provides you with a slip to have blood drawn, it is extremely important that you have the labwork done within 7 days. However, you will only be notified by phone to discuss abnormal results. All normal labwork will be reviewed at your next prenatal visit.
- If you ever have any questions regarding your pregnancy or our practice, please contact the OB Nurse Coordinator at (732)235-6143.

Dear Patient:

Thank you for choosing Robert Wood Johnson University Hospital for your healthcare needs.

To help expedite the registration process for you on the day of your Pre-Admission Testing/Admission, we ask that you pre-register by calling the Pre-registration Department at (732) 937-8863 or on-line at www.rwjuh.edu and clicking on the Pre-Register link. 844-795-4968 ask for ARISSO.

If you come in for your Pre-Admission Testing/Admission, we request that you bring with you the following:

- · All paperwork your physician has given to you.
- A valid <u>picture</u> ID and proof of address if your new address is not on your identification card.
- Insurance Cards.
- Any insurance forms or referral forms as required by your insurance provider. *If
 your insurance provider requires pre-certification for Pre-Admission Testing or
 your Admission, we encourage you to do that at this time to avoid any payment
 penalty.
- Your money for your co-pay when required. If you are unsure if anything is
 owed, please call the Pre-Registration Department at (732) 937-8863. These
 registration coordinators have access to your insurance information and can
 provide you with a breakdown of your insurance.
- Your social security number and the social security number of the person whose insurance you are covered under.
- Your Advanced Directive/Living Will (if you have executed one).
- The names and dosages of any medication you take.

We hope that this service enables us to better serve you. If we can be of any additional help to you before the day of your Pre-Admission Testing/Admission, please feel free to call us at (732) 937-8863.

Thank you in advance.

Very truly yours,

The Admissions and Registration Department Robert Wood Johnson University Hospital

State of New Jersey Department of Health and Senior Services Notice of Availability of Supplemental Newborn Screening

New Jersey law mandates that every baby born n New Jersey be screened for 20 disorders that can cause serious health problems. These disorders may not be apparent at birth, but if left undetected and not treated early in life, can lead to problems that include mental retardation, disability, or even death.

The New Jersey Department of Health and Senior Services' Newborn Screening Program performs screening tests for these 20 disorders on all newborns within 48 hours after birth. The State laboratory uses an advanced technology, called tandem mass spectrometry (MS/MS), to test for these disorders. This technology may detect the presence of additional disorders for which screening is not mandated. If the State laboratory detects the presence of any disorder, the State will notify your healthcare provider.

New Jersey law requires healthcare providers to provide this pamphlet to expectant parents and guardians to advise you of the following. Supplemental newborn screening is available for other disorders in addition to the 20 disorders for which State law mandates screening. The State does not perform supplemental newborn screening. Supplemental newborn screening is optional. Your healthcare provider may recommend that supplemental newborn screening be performed. The cost for supplemental newborn screening is an out-of-pocket expense. The screening tests that private laboratories perform may repeat the tests for some or all of the 20 disorders for which the State already conducts screening.

If you decide to have supplemental newborn screening performed:

- Preferably several months in advance of your delivery date, you will need to purchase a supplemental screening test kit from a laboratory authorized by the US Food and Drug Administration (FDA).
- You will have to read and follow the instructions provided with the test kit, and tell
 your healthcare provider that you want supplemental screening.
- Typically, your healthcare provider will have to sign an order for the test, and the private laboratory will send the results to your healthcare provider.
- The State Newborn Screening Program will not receive the supplemental screening test results.

Pregnancy is a time when women are very careful about what medications and food they take. The following medications are a list of common medicines that are safe to take at any time during your pregnancy

For Heartburn:

Elevate Head with pillow

Do not lie down immediately after eating

Do not eat after 6pm; avoid spicy, acidic or fried foods or food/drinks with caffeine

May take Tums, Maalox, Mylanta, Zantac or Prilosec

DO NOT TAKE ROLAIDS or ALKASELTZER

For Nausea:

Try eating small frequent meals

Avoid fatty/spicy foods

Eat ginger cookies, drink flat ginger ale

Vitamin B6 25 mg every 8 hrs

Benadryl or Unisom at bedtime

For Constipation:

Drink at least 8- (80z) glasses of water each day

Increase fiber by eating whole grain foods, fresh fruits and vegetables

Small cup of warm prune juice

Fibercon, Miralax or Colace (take as directed on bottle) It may take up to one week before you have results from stool softeners

Senokot, Metamucil, milk of magnesia, Fleets enema. If constipation is not relieved by stool softeners or any of these medications, contact the office

Claritin or Zyrtec

Plain Mucinex

Vicks Vapor Rub

Halls Cough drops
