

HIV WEB RESOURCES

CDC websites provide many resources to support your HIV prevention and treatment activities.

CDC HIV: www.cdc.gov/hiv

CDC's Division of HIV Prevention provides resources that educate people about HIV and help partners deliver effective prevention and treatment programs. Get information about HIV transmission, prevention, and testing; data about HIV in the United States; fact sheets about HIV among specific populations; resources for health care providers; and materials for promoting HIV awareness days.

Let's Stop HIV Together: www.cdc.gov/stophivtogether

The *Let's Stop HIV Together* campaign focuses on raising HIV awareness among all Americans and reducing the risk of getting or transmitting HIV among the most-affected populations. Get campaign resources such as videos, posters, and web banners to promote testing, encourage prevention, reduce HIV stigma, and help people with HIV stay in care. The site also includes resources for health care providers on HIV testing and care.

HIV Risk Reduction Tool: hivrisk.cdc.gov

CDC's HIV Risk Reduction Tool helps people learn about their risk of getting or transmitting HIV and how to lower that risk. Users can get customizable content based on their gender, HIV status, and the gender of their sexual partners. They can also compare the risk of specific sexual activities and see how different factors such as using a condom affect that risk.

HIV Nexus: www.cdc.gov/hiv/clinicians

CDC's HIV Nexus provides clinicians with information across the HIV continuum. This one-stop location includes up-to-date tools and guidelines for your practice, links to continuing education opportunities, and educational materials for your patients.

GetTested: gettested.cdc.gov

GetTested provides information about testing for HIV, other sexually transmitted diseases (STDs), and viral hepatitis. Visitors can find free, fast, and confidential testing locations near them.

Compendium of Evidence-Based Interventions and Best Practices for HIV Prevention: cdc.gov/hiv/research/interventionresearch/compendium

The Compendium provides evidence-based interventions and best practices on pre-exposure prophylaxis (PrEP); structural interventions; linkage to, retention in, and re-engagement in care; medication adherence; and risk reduction. Partners can find interventions most appropriate for HIV prevention in their communities.

AtlasPlus: www.cdc.gov/nchhstp/atlas

CDC's AtlasPlus allows users to analyze more than 15 years of HIV, STD, viral hepatitis, and tuberculosis (TB) data at national, state, and county levels. AtlasPlus also provides access to indicators on PrEP coverage and social determinants of health. Users can create and export custom maps, tables, and charts, explore data by population groups, and look at trends.

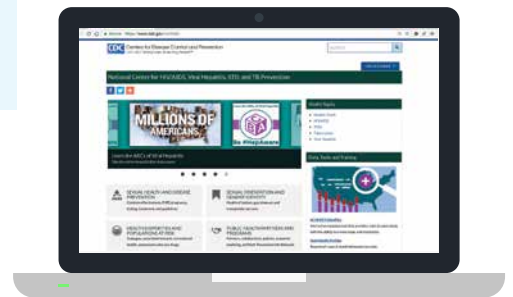

National Prevention Information Network: npin.cdc.gov

The National Prevention Information Network (NPIN) is a clearinghouse for information on HIV, viral hepatitis, STDs, TB, and school health. NPIN offers resources such as digital media tools, funding information, and health communication guidance to help partners develop their own prevention programs. Sign up for email updates and join the NPIN Community to collaborate with other prevention professionals.

CDC National Center for HIV, Viral Hepatitis, STD, and TB Prevention: www.cdc.gov/nchhstp

The National Center for HIV, Viral Hepatitis, STD, and TB Prevention leads CDC's US prevention and control efforts for those diseases. The center's website provides information for the consumer, media, researcher, public health professional, and more, and covers topics such as prevention, treatment, surveillance, research, disease data, resources, and policies.

Effective Interventions: cdc.gov/hiv/effective-interventions

The Effective Interventions site helps you provide HIV prevention services. Find public health strategies and behavioral, biomedical, and structural interventions to use in your community. Get training for your staff through the Capacity Building Assistance Provider Network (www.cdc.gov/hiv/capacity-building-assistance), and learn about in-person training opportunities around the country.
